

The End of N+1 is Near

Jens Schauder

Trigger Warning!

**This talk contains SQL.
Lots.**

Proceed at own risk.

But there are Minions!

N + 1

Minions mit ihren Toys

1. Lade Minions
2. Lade für jeden Minion die Toys

```
select * from minion where ...  
into minions;
```

```
foreach Minion m : minions  
    Select * from toy where minion_id = m.id
```

Because Reasons!

What should we load?

Minions

-> EvilMaster

-> Antagonist

-> SuperPower

Aggregates!

But How?

Demo Time

More Ideas

Specify Where Clause Only

R2DBC

GraphQL?

Select Trees of Aggregates?

**I have ideas for preemptive
caching ...**

Thank you
